Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Status

Claims 1-81 have been examined.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1 – 4, 28-31 and 55-58 are rejected under 35 U.S.C. 103(a) as being unpatentable over Teicher, (US Patent 6,076,075) in view of Lee et al. (US Patent No 6,003,014).

As per claim 1,

Teicher ('075) discloses a method of conducting a transaction between a user of a remote communications device and a second party, comprising:

creating a deferred transaction data structure, corresponding to the transaction data structure that defines a deferred transaction, when establishing communication between the remote communications device and the second party is at least one of temporarily not obtainable and interrupted;(Column 21, lines 30-39)

storing the deferred transaction data structure in a memory;(Column 21, lines 15-29; Figure 12)

establishing communication between the remote communications device and the second party;(Column 8, lines 55-65)

transmitting the deferred transaction data structure to the second party when the communication between the remote communications device and the second party is established.(Column 22, lines 24-30)

Teicher ('075) does not explicitly disclose creating a transaction data structure based on input from the user that defines the transaction. Lee et al. ('014) discloses creating a transaction data structure based on input from the user that defines the transaction (Figure 5) It would be obvious to one having ordinary skill in the art at the time of the invention to combine Teicher's method with Lee et al's teaching of creating a data structure that stores a transaction in order to allow the consumer to have a receipt of the transaction.

Claims 28 and 55 are in parallel with claim 1 and are rejected for the same reasons.

As per claim 2,

Teicher ('075) discloses the method of claim 1,

Art Unit: 3621

Wherein the deferred transaction data structure is automatically transmitted to the second party when the communication between the remote communications device and the second party is established.(Column 22, lines 24-30)

Claims 29 and 56 are in parallel with claim 2 and are rejected for the same reasons.

As per claim 3,

Teicher ('075) discloses the method of claim 1,

Official Notice is taken that "transaction data structure is encrypted prior to at least one of storing in the memory and transmitting it to the second party" is common and well known in prior art in reference to electronic commerce. It would have been obvious to one having ordinary skill in the art at the time the invention was made to encrypt the data structure in order to prevent exposing financial data to unauthorized sources.

Claims 30 and 57 are in parallel with claim 3 and are rejected for the same reasons.

As per claim 4,

Teicher ('075) discloses the method of claim 1,

wherein the second party is taken from the group consisting of one or more settlement entities, one or more merchants, one or more financial institutions one or more other entities , and a person.(Column 8, lines 48-54)

Claims 31 and 58 are in parallel with claim 5 and are rejected for the same reasons.

Allowable Subject Matter

Claims 5-27, 32-55 and 59-81 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

Examiners note: Examiner has cited particular columns and line numbers in the references as applied to the claims above for the convenience of the applicant. Although the specified citations are representative of the teachings of the art and are applied to the specific limitations within the individual claim, other passages and figures may apply as well. It is respectfully requested from the applicant in preparing responses, to fully consider the references in entirety as potentially teaching all or part of the claimed invention, as well as the context of the passage as taught by the prior art or disclosed by the examiner.
